

# Admin Assistance

The repetitive admin of the practice, off your team's plate.

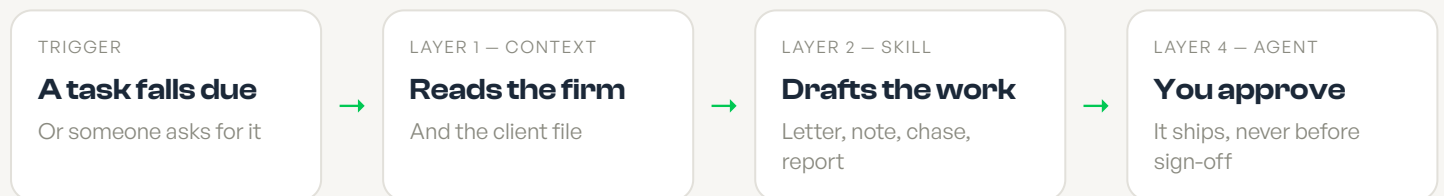

## THE COST TODAY

**Skilled accountants spending the day on admin a system could do in the background.**

## WHAT IT DOES

- Drafts engagement letters, file notes, and month-end commentary in your format
- Triage the inbox and drafts replies against each client's file
- Chases overdue fees and missing documents until they land
- Builds the 8:30am practice brief: deadlines, jobs at risk, what needs a decision
- Turns meeting transcripts into filed notes and action items

## HOW IT WORKS

## WHERE IT GOES

### Reactive

You ask, it drafts

### Proactive

It surfaces the work first

### Bounded autonomy

Routine runs itself, exceptions reach a human

**Hours**

back every week

### Humans write, AI reads.

The brain is edited only by your people, through a review step. Nothing ships without sign-off, and you own the whole stack.
