

Onboarding Support

From signed to fully operational, with reduced partner admin.

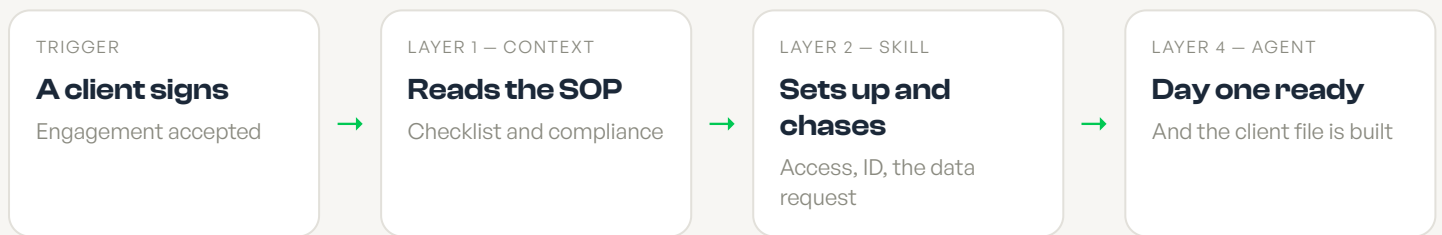

THE COST TODAY

Every new client onboarded by hand. The same compliance steps, every time.

WHAT IT DOES

- Orchestrates setup on signing: AML and ID checks, ATO agent nomination, ethical clearance to the prior accountant
- Provisions software access (Xero, MYOB) and creates the job in your practice tool
- Drafts the request-for-information email, then chases what is outstanding until complete
- Builds the client's record in the brain, so every other assistant knows them at once
- Runs the first 90 days: what to expect, and the first deadlines

HOW IT WORKS

WHERE IT GOES

Day one

fully set up

Humans write, AI reads.

The brain is edited only by your people, through a review step. Nothing ships without sign-off, and you own the whole stack.
